How to create your personal Codeword

To ensure we can correctly assign your data while maintaining confidentiality, we need a personal identifier (codeword). This codeword is designed in a way that prevents anyone, including us, from linking it back to you. However, you will always be able to reconstruct it if needed, even if you forget it. If necessary, we can remind you of the rule for creating it.

Your Codeword consist of Four elements:

Before filling the boxes, please read the important notes and the example below.

1. The last two letters of your mother's birth surname (maiden name)
2. The number of letters in your mother's (first) given name
3. The last two letters of your father's (first) given name.
4. Your birth day (only the day, not the month of year)

Important notes

- Write all numbers as two digits(e.g., use a leading zero if necessary: 04 instead of 4).
- If your parent has multiple first names, only use the first one.
- If you do not know a required name, replace the letters with XX and the numbers with 00.

Example (Fictional)

- Mother's name: **Elke**-Hannelore Müller (born Mayerhofer)
- Father's name: **Wolf**-Rüdiger Müller
- Your birthday: **09.11.1987**
- Codeword: ER04LF09
